About the project

The European project “**Cities go climate neutral**”, has as general objective to enhance and upskill the competences of municipal employees in order to enable them to design climate-neutral cities strategies, such as Climate City Contracts. In particular, the project involves municipalities from five European countries (Belgium, Italy, Malta, Greece, and Croatia), providing necessary knowledge and tools for their employees to engage with climate neutrality projects, both at a theoretical level (e.g., EU policies) as well as at a practical level (entrepreneurial and organisational training).
